

THE WORLD'S MOST COMPACT WHITE LIGHT LASER PROJECTOR WITH STUNNING COLOUR DEFINITION

LASER TECHNOLOGY 13,0 Watt Laser Projector

Full Power:	13,0 W
Laser white balance	10 W typ > 10,0 W
Internal Laser Sources:	
Red Diode	~ 650 nm, 640 nm > 5,0 W
Green DPSS	532 nm 6,0 W
Blue Diode	445 nm ~ 450 nm > 2,5 W
Beam diameter / divergence	< 4.0 mm / 1 mrad
Analog Modulation	0 - 5 V up to 30 kHz
Power Consumption	110 - 230 VAC @ max 600W
Control	CPU Controlled L C display for function control
Signal Input / Output	ILDA Standard
Scanner	Cambridge Technology / High speed driver
Operational Temperature	8° C up to 30° C [Optimal 25 °C]
Operation	Automatic cooling and heating for optimal performance
Enclosure	Dustproof housing and sealed optical module
Dimensions	615mm(w) x 281mm(h) x 270mm(d)

Projection System	Cambridge Technology 6800 HP
Projection Angle	Max 60kpps @ 8° and 26kpps @ 20° scan angle

This is high tech-laser equipment. Be careful of mechanical Shocks, avoid exposure to high or low Temperatures(exposure to sun or temperature over 35 degrees celsius

Avoid static electrical power whilst handling/installing any laser Hardware
